

Role: Teacher

School Name: Halifax Regional Centre for Education

How did you incorporate the use of the pen?

Students used it for taking notes from textbooks. It's good for reading when an auditory copy is not available.

How long did it take you to use the pen accurately?

I still need to play around to realize all of its features but it's very easy to learn.

Did you feel confident with the pen and its features?

Yes.

How much training time did your students require to become confident users?

Just playing around with it for a while.

Were students encouraged by its potential once familiar with its features?

Very much so!

Would you recommend the pen, and if so why?

Yes, to students who can work independently but require reading support.

Other comments:

Great technology for students to carry with them and use on the go. It's more useful for students to have than one/SLD teacher.
